Subject index

Acetic acid
GC separation and detection of C_1 to C_3 monocarboxylic acids as the *p*-substituted benzyl esters, 63
Acids
GC separation and detection of C_1 to C_3 monocarboxylic —— as the *p*-substituted benzyl esters, 63
Adenine
TLC of —— and its metabolites, 496
Adenines
TLC of cyclic adenosine 3′,5′-monophosphate on tetraborate-impregnated silica gel layers, 171
Adenosine 3′,5′-monophosphate
TLC of cyclic —— on tetraborate-impregnated silica gel layers, 171
Adsorbents
A comparison of TLC ——, supports and developing units, 291
Agarose
Increased resolution of polymers through longitudinal compression of agarose gel columns, 494
Alicyclic sulphides
GLC retention data of some aliphatic and ——, 69
Aliphatic sulphides
GLC retention data of some —— and alicyclic sulphides, 69
Alkali flame detector
The negative response, 47
Alkaline earth metal ions
The effect of sample concentration on the gel chromatographic behaviour of —— on Sephadex columns, 329
Alkanes
Radiolysis products as reference substances in GC, 227
Amine
Chromatography of biogenic —— metabolites and related compounds on lipophilic Sephadex. II. The catecholamines and their 3-O-methylated derivatives, 87
Amines
Argentation TLC with silver oxide. II. ——, unsaturated and aromatic carboxylic acids, 500
Amino acid analysers
Buffer preservative failure and modification of in-line buffer filter for automated step-change ——, 152
Amino acid
An experimental study of —— degradation under open flask hydrolytic conditions, 405
Amino acids
Chromatographic and electrophoretic behaviour of aminophosphonic acids on layers of cation exchangers, 421
Amino acids
Determination of N-methyl- —— and their optical purity with an amino acid analyser, 251
Amino acids
The hydrolysis of proteins, 393
Amino acids
The identification of polymyxin B sulphate, 154
Amino acids
Isotachophoresis. The separation of ——, 415
Aminophosphonic acids
Chromatographic and electrophoretic behaviour of —— on layers of cation exchangers, 421
Antibiotics
Characterisation of phosphonomycin by microchromatographic and related techniques, 111
Antibiotics
The identification of polymyxin B sulphate, 154
Antioxidants
Studies on the synthesis of butylated hydroxyanisole, 507
Apparatus
An arrangement for simultaneous elution of TLC plate with several solvents, 169
Argentation thin-layer chromatography
——, with silver oxide. II. Amines, unsaturated and aromatic carboxylic acids, 500
Benzaldehyde
Polyvinyl acetate as a stationary phase in TLC, 429
Benzene
Relations between GC behaviour and chemical structure. III. The nature of internal rotation in methyl derivatives of ——, 21
Bromine
A second-order reaction on a GC column. II. Decomposition of IBr on a chromatographic column, 39
Butanal
Polyvinyl acetate as a stationary phase in TLC, 429
Caffeic acid
Rapid electron capture determination of —— and quercetin moieties in plants, 385
Capacitance detectors
Role of the mobile phase permittivity in the use of the —— in liquid chromatography, 213
Caramiphen hydrochloride
GLC of —— and its analogues, 138
Carbamates
Separation and detection of —— and

related compounds on polyamide layers, 453
Carbohydrates
Densitometry of thin-layer chromatograms using polaroid projection film. Application to the analysis of monosaccharides, 437
Carbohydrates
Polyacrylamide gel electrophoresis and gel filtration of dyed polysaccharides, 165
Carboxylic acids
Argentation TLC with silver oxide. II. Amines, unsaturated and aromatic ——, 500
Carboxylic acids
GC separation and detection of C_1 to C_3 mono- —— as the *p*-substituted benzyl esters, 63
Catecholamines
Chromatography of biogenic amine metabolites and related compounds on lipophilic Sephadex. II. The —— and their 3-O-methylated derivatives, 87
Catecholamines
Quantitative TLC estimation of labelled dopamine and norepinephrine, their precursors and metabolites, 305
Cellodextrins
The separation of —— by gel permeation chromatography, 273
Chlorinated hydrocarbon insecticides
TLC–enzymatic identification and the mode of action of ——. II. Identification by inhibition of trypsin, 447
Chlorinated hydrocarbon pesticides
Design of a column for the gas chromatographic analysis of ——, 141
Chloroplast pigments
Chromatography of fat-soluble —— on preformed kieselguhr layers, 177
Cocaine
Assay of —— in the presence of procaine and quinine by CC, 107
Column
A simple quantitative method for trapping and transfer of low concentration GC fractions suitable for use with small diameter glass —— systems, 375
Cyclamate
Detection and estimation of —— by TLC, 354
Cyclamate
Separation and detection of synthetic sweetners by TLC, 173
Cystine
An experimental study of amino acid degradation under open flask hydrolytic conditions, 405
Detector
The negative alkali flame—— response, 47
Detector
A solid electrolyte —— for the determination of trace amounts of oxygen in the presence of argon and other gases, 367
Detectors
Role of the mobile phase permittivity in the use of the capacitance —— in liquid chromatography, 213
Dextrins
The separation of cello- —— by gel permeation chromatography, 273
Dicarboxylic acids
Identification of hydroxy acids and —— by combined TLC and GC, 145
DNA
Fractionation of —— on a metal ion equilibrated cation exchanger. I. Chromatographic profiles of —— on an IR-120 Al^{3+} column, 119
DNA
The separation of nucleic acids on basic polyamino acid–kieselguhr columns, 158
Dopamine
Quantitative TLC estimation of labelled —— and norepinephrine, their precursors and metabolites, 305
Drugs
Assay of cocaine in the presence of procaine and quinine by CC, 107
Drugs
A comparison of TLC adsorbents, supports and developing units, 291
Drugs
GC detection of nitrogen-containing —— in aqueous solutions by means of the nitrogen detector, 237
Drugs
The rapid separation of nucleotides in cell extracts using high-pressure liquid chromatography, 257
Dulcin
Separation and detection of synthetic sweetners by TLC, 173
Dyes
Lower limits of molecular weights of compounds excluded from Sephadex G-25 eluted with aqueous acetone mixtures. Application of the results to the separation of the components of tannic acid, 285
Electrolyte detector
A solid —— for the determination of trace amounts of oxygen in the presence of argon and other gases, 367
Enzymes
A simple technique for the estimation of mitochondrial glutamate–oxaloacetate transaminase in serum and tissues, 162
Fatty acids
The identification of polymyxin B sulphate, 154
Formic acid
GC separation and detection of C_1 to C_3 monocarboxylic acids as the *p*-substituted benzyl esters, 63
Fucose
Densitometry of thin-layer chromatograms using polaroid projection film. Application to the analysis of monosaccharides, 437
Furane
The GC behaviour of some isomeric derivatives of thiophene and ——, 347

Gallic acid
Lower limits of molecular weights of compounds excluded from Sephadex G-25 eluted with aqueous acetone mixtures. Application of the results to the separation of the components of tannic acid, 285
Gas chromatography
Experimental study of the effect of column length and pressure on the HETP in ——, 1
Gas chromatography
Pressure induced turbulence in a packed —— column, 221
Gas chromatography
Radiolysis products as reference substances in ——, 227
Gas chromatography
Relations between —— behaviour and chemical structure. III. The nature of internal rotation in methyl derivatives of benzene, 21
Gas chromatography
A second-order reaction on a —— column. I. Computational analysis by the plate theory, 31
Gas chromatography
A second order reaction on a —— column. II. Decomposition of IBr on a chromatographic column, 39
Gas chromatography
A simple quantitative method for trapping and transfer of low concentration —— fractions suitable for use with small diameter glass column systems, 375
Gas chromatography
Study of —— parameters obtained by coupling a longitudinal temperature gradient with a linear temperature programmation, 9
Gases
A solid electrolyte detector for the determination of trace amounts of oxygen in the presence of argon and other ——, 367
Gel chromatography
Increased resolution of polymers through longitudinal compression of agarose gel columns, 494
Gel chromatography
Principles of ——, 205
Gibberellins
A method for the rapid chromatography of ——, 512
Glucose
Densitometry of thin-layer chromatograms using polaroid projection film. Application to the analysis of monosaccharides, 437
Glutamate–oxaloacetate transaminase
A simple technique for the estimation of mitochondrial —— in serum and tissues, 162
Glycosides
A method for the identification and quantitative analysis of Strophantus ——, 313
Guanosine
Chromatography on macroporous ion exchangers, 351
Herbicides
The GLC determination of 2-hydroxy-*s*-triazines, 487
Herbicides
Separation and detection of carbamates and related compounds on polyamide layers, 453
Hippuric acid
The separation of the UV-absorbing constituents of urine by high-pressure liquid chromatography, 97
Hormones
TLC of DANSYL-oestrogens, 505
Hydrazones
Polyvinyl acetate as a stationary phase in TLC, 429
Hydrocarbon insecticides
TLC–enzymatic identification and the mode of action of chlorinated ——. II. Identification by inhibition of trypsin, 447
Hydrocarbons
GC behaviour of tricyclic saturated ——. The relation between the retention indices and the stereochemical structure of the tricyclanes, 77
Hydrocarbons
Radiolysis products as reference substances in GC, 227
Hydroquinine
The use of R_C values for structural studies in the PC of phenols, 131
Hydroxy acids
Identification of —— and dicarboxylic acids by combined TLC and GC, 145
Hydroxyanisole
Studies on the synthesis of butylated ——, 507
2-Hydroxy-*s*-triazines
The GLC determination of ——, 487
Indole
Analysis of —— acid derivatives by GC using liquid phase OV-101, 491
Inorganic ions
The effect of sample concentration on the gel chromatographic behaviour of alkaline earth metal ions on Sephadex columns, 329
Inorganic ions
Gel chromatographic behaviour of some metal ions, 321
Inorganic ions
TLC behaviour of a number of metal ions on DEAE-cellulose in thiocyanic acid–organic solvent mixtures, 339
Inorganic volatile chlorides
GC of ——. A study of their reactivity towards certain column packing materials, 461
Insecticides
TLC–enzymatic identification and the mode of action of chlorinated hydrocarbon ——. II. Identification by inhibition of trypsin, 447

Iodine
A second-order reaction on a GC column. II. Decomposition of IBr on a chromatographic column, 39
4,4'-Isopropylidenebisphenol
The use of R_C values for structural studies in the PC of phenols, 131
Isotachophoresis
The separation of amino acids, 415
Kaempferol
Rapid electron capture determination of caffeic acid and quercetin moieties in plants, 385
Lactose
Assay of cocaine in the presence of procaine and quinine by CC, 107
Lipids
Recovery of —— from TLC for radioassay, 498
Lipids
Simple method of gradient elution in TLC of ——, 357
Metal ions
The effect of sample concentration on the gel chromatographic behaviour of alkaline earth —— on Sephadex columns, 329
Metal ions
Gel chromatographic behaviour of some ——, 321
Metal ions
TLC behaviour of a number of —— on DEAE-cellulose in thiocyanic acid–organic solvent mixtures, 339
Methamphetamine
GC detection of nitrogen-containing drugs in aqueous solutions by means of the nitrogen detector, 237
N-Methylamino acids
Determination of —— and their optical purity with an amino acid analyser, 251
Mitochondrial glutamate–oxaloacetate transaminase. A simple technique for the estimation of —— in serum and tissues, 162
Monocarboxylic acids
GC separation and detection of C_1 to C_3 —— as the *p*-substituted benzyl esters, 63
Monosaccharides
Densitometry of thin-layer chromatograms using polaroid projection film. Application to the analysis of ——, 437
Mycin
Characterisation of phosphono- —— by microchromatographic and related techniques, 111
Myrcetin
Rapid electron capture determination of caffeic acid and quercetin moieties in plants, 385
Nitrogen
Oxygen– —— separation on Cr_2O_3 gel, 486
Norepinephrine
Quantitative TLC estimation of labelled dopamine and ——, their precursors and metabolites, 305
Nucleic acids
Fractionation of DNA on a metal ion equilibrated cation exchanger. I. Chromatographic profiles of DNA on an IR-120 Al^{3+} column, 119
Nucleic acids
The separation of —— on basic polyamino acid–kieselguhr columns, 158
Nucleotides
The rapid separation of —— in cell extracts using high-pressure liquid chromatography, 257
Oestrogens
TLC of DANSYL- ——, 505
Oxo acids of phosphorus
Gel chromatographic behaviour of the ——, 469
Oxygen
—— –nitrogen separation on Cr_2O_3 gel, 486
Oxygen
A solid electrolyte detector for the determination of trace amounts of —— in the presence of argon and other gases, 367
Parpanit
GLC of Caramiphen hydrochloride and its analogues, 138
Pentanal
Polyvinyl acetate as a stationary phase in TLC, 429
Peptides
The identification of polymyxin B sulphate, 154
Pesticides
Design of a column for the gas chromatographic analysis of chlorinated hydrocarbon, ——, 141
Pesticides
The GLC determination of 2-hydroxy-*s*-triazines, 487
Pesticides
Separation and detection of carbamates and related compounds on polyamide layers, 453
Pesticides
TLC–enzymatic identification and the mode of action of chlorinated hydrocarbon insectisides. II. Identification by inhibition of trypsin, 447
Phenols
Lower limits of molecular weights of compounds excluded from Sephadex G-25 eluted with aqueous acetone mixtures. Application of the results to the separation of the components of tannic acid, 285
Phenols
The use of R_C values for structural studies in the PC of ——, 131
Phosphates
Gel chromatographic behaviour of linear ——, 481
Phospholipids
Recovery of lipids from TLC for radioassay, 498
Phosphonic acids

Chromatographic and electrophoretic behaviour of amino- —— on layers of cation exchangers, 421
Phosphonomycin
Characterisation of —— by microchromatographic and related techniques, 111
Phosphorus
Gel chromatographic behaviour of the oxo acids of ——, 469
Polymyxin B
The identification of —— sulphate, 154
Polysaccharides
Polyacrylamide gel electrophoresis and gel filtration of dyed ——, 165
Polyvinyl acetate
—— as a stationary phase in TLC, 429
Procaine
Assay of cocaine in the presence of —— and quinine by CC, 107
Propionic acid
GC separation and detection of C_1 to C_3 monocarboxylic acids as the *p*-substituted benzyl esters, 63
Proteins
An experimental study of amino acid degradation under open flask hydrolytic conditions, 405
Proteins
The hydrolysis of ——, 393
Pyrocatechol
The use of R_C values for structural studies in the PC of phenols, 131
Quercetin
Rapid electron capture determination of caffeic acid and —— moieties in plants, 385
Quinine
Assay of cocaine in the presence of procaine and —— by CC, 107
Quinones
Identification reactions after chromatography of quinoidal compounds, 180
Radiolysis products
—— as reference substances in GC, 227
RNA
The separation of nucleic acids on basic polyamino acid–kieselguhr columns, 158
Saccharin
Separation and detection of synthetic sweeteners by TLC, 173
Strophantus glycosides
A method for the identification and quantitative analysis of ——, 313
Sugars
Densitometry of thin-layer chromatograms using polaroid projection film. Application to the analysis of monosaccharides, 437
Sugars
See also Carbohydrates
Sulphides
GLC retention data of some aliphatic and alicyclic ——, 69
Supports
A comparison of TLC adsorbents, —— and developing units, 291
Sweeteners
Detection and estimation of cyclamate by TLC, 354
Sweeteners
Separation and detection of synthetic —— by TLC, 173
Tannic acid
Lower limits of molecular weights of compounds excluded from Sephadex G-25 eluted with aqueous acetone mixtures. Application of the results to the separation of the components of ——, 285
Thin-layer chromatography
An arrangement for simultaneous elution of one —— plate with several solvents, 169
Thin-layer chromatography
A comparison of —— adsorbents, supports and developing units, 291
Thiophene
The GC behaviour of some isomeric derivatives of —— and furane, 347
Thymine
Chromatography on macroporous ion exchangers, 351
Triazines
The GLC determination of 2-hydroxy-*s*-——, 487
Tricyclanes
GS behaviour of tricyclic saturated hydrocarbons. The relation between the retention indices and the stereochemical structure of the ——, 77
Trypsin
TLC–enzymatic identification and the mode of action of chlorinated hydrocarbon insecticides. II. Identification by inhibition of trypsin, 447
Tryptophan
An experimental study of amino acid degradation under open flask hydrolytic conditions, 405
Uracil
Chromatography on macroporous ion exchangers, 351
Uric acid
The separation of the UV-absorbing constituents of urine by high-pressure liquid chromatography, 97
Urine
The separation of the UV-absorbing constituents of —— by high-pressure liquid chromatography, 97
Xanthins
Chromatography of fat-soluble chloroplast pigments on preformed kieselguhr, 177
